 [NCR's ISO 14001 CERTIFICATION](#)

[LEARN MORE](#) about carbonless and NCR PAPER\* brand sheets via an audio presentation.

**"I DIDN'T KNOW THAT I COULD RUN CARBONLESS ON MY INK JET OR LASER PRINTER?"** Customers who are converting to digital printing can be confused how this is done. Unlike the multi-part continuous forms paper, when you print on a digital printer, each sheet is individually printed.

**"A government big enough to give you everything you want, is strong enough to take everything you have.."**

## **WHERE TO START:**

Unlike our [COLLATED BOND](#), carbonless paper has a coating that will transmit an image (CB), receive an image (CF) or both (CFB). Because of these coatings, you can not just turn the paper over in your paper tray to adjust how the color sequence will be delivered to your tray. That is why all carbonless brands sell the same paper two ways. One will be forward sequence (White, Canary, Pink) and the other reversed (Pink, Canary, White). The one you need depends on the printer you will be using and how it prints and delivers the paper. To help you to find out which sequence you will need, we have a [CARBONLESS SEQUENCE TEST PROCEDURE](#). If you are going to order 3 or more parts, this test must be done. For 2 part, to reverse the sequence, move the top sheet move it to the bottom.

FOR PRICING, OR TO ORDER, click on one the following links.

### **[NCR STREIGHT SEQUENCE:](#)**

White / Canary  
White / Pink  
White / Canary / Pink  
White / Canary / Pink / Goldenrod  
White / Green / Canary / Pink / Goldenrod

### **[NCR REVERSE SEQUENCE:](#)**

Canary / White  
Pink / White  
Pink / Canary / White  
Goldenrod / Pink / Canary / White  
Goldenrod / Pink / Canary / Green / White

### **[INDIVIDUAL COLORS AND COATINGS:](#)**

Some customers multiple tray printers and require the sheets to be un-collated.

### **[SUPERIOR PERF \(LaserSnap\) FORM SETS:](#)**

The same paper with an additional 1/2" perforated stub. Designed to be padded after printing, only the stub is glued which allows individual copies to be removed without the complete set falling apart.

### **[CUSTOM PAPER COLOR SEQUENCE:](#)**

Select several standard paper colors in any sequence for each of the set positions from two part, up to 6 part. You can also order your terms and conditions printed on the back along with other forms printing options.

### **[PADDING ADHESIVE:](#)**

Unlike scratch pad glue, this adhesive will single out the individual sets in a stack and only glue the sets together.

## NCR Brand Collated Carbonless

### Why did my order not ship in the original factory box?

Due to a number of large boxes of carbonless and collated bond paper being damaged or destroyed by UPS in a single 30 day period, we have been forced to adopt a new UPS shipping policy. All orders of 25 lbs or more must be shipped in a box that has a 275 lb. per square inch bursting test certification printed on the bottom of the box. The original factory boxes do not meet this UPS requirement. To be able to guarantee safe delivery of your order and to be able to place a claim in the event of any damage, we must now transfer the product to the heavier box.

#### Declared Value

Declared value is not insurance. The declared value of your shipment indicates UPS's maximum liability for a package that is lost or damaged. UPS's liability is limited to US\$100.00 (or local currency equivalent) on packages with no declared value. You can choose to declare a higher value for your shipment up to the maximum allowed in your country, by entering a declared value in the shipping system used and paying an additional charge. When you declare a value in excess of \$100 (or local currency equivalent), you do not receive any form of insurance. Shippers desiring cargo insurance, all risk insurance, or another form of insurance should purchase such insurance from a third party.

Limits on declared value and restrictions on UPS's liability (including for packages not adequately packaged) are described in the UPS Tariff/Terms and Conditions of Service, available at UPS.com. For non-U.S. origin shipments, please refer to the UPS Terms and Conditions of the origin country.

**LIMITS AND CONDITIONS:** Your shipment must be boxed to UPS standards for packing and the box must have a "Box Certificate" printing on the bottom stating that the "Bursting Test" is equal to, or greater than, 275 lbs per square inch. No claim will be considered if these conditions are not met.
